DETAILED ACTION

Drawings

1. The drawings were received on 5/5/03. These drawings are acceptable.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claim 77 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 77 contains "the recording instructions are downloaded from the server through a VBI of the television signal". Such information is nowhere described in the original specification that the inventor, at the time the application was filed, had possession of the claimed invention.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3-8, 13-15, 27-30; and 37-78 rejected under 35 U.S.C. 103(a) as being unpatentable over Schein et al (6,388,714) in view of Klosterman (5,550,576) for the same reasons as set forth in Section 3 of the last office action, dated 7/18/05.

Response to Arguments

6. Applicant's arguments filed 8/30/05 have been fully considered but they are not persuasive. Applicant asserts on pages 16-17 of the Remarks that Klosterman fails to disclose downloading any recording instructions. However, Figure 1 of Klosterman illustrate the concept of such recording instructions (e.g. source, time, etc.) being downloaded from various sources 26-30.

Applicant asserts on page 18 of the Remarks that Examiner fails to point to any elements in the art that meets the claim limitations. However, Figure 1 of both Schein et al and Klosterman, as pointed out by the Examiner, illustrate the concept of such computing system (PC of Schein et al and 20 of Klosterman) and the recording device VCR are integrated into a single device (2 of Schein et al and 10 of Klosterman).

Conclusion

7. All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
